WSU Center for Real Estate releases 2022 Lawrence Housing Forecast

Lawrence home prices will rise by 6.7 percent next year according to the 2022 Lawrence Housing Forecast published by the Wichita State University Center for Real Estate.

“The supply of homes available for sale remains near historic lows,” said Stan Longhofer, director of the WSU Center for Real Estate. “Although bidding wars may not be as intense as they were earlier this year, it will continue to be a sellers’ market across most market segments.”

Longhofer will present the forecast at 8:45 a.m. Thursday, Oct. 14, at an event with the Lawrence Board of Realtors at Arterra Event Gallery in Lawrence. Longhofer will be available for interviews following his presentation at about 9:30.

The Lawrence Housing Forecast is part of the 2022 Kansas Housing Markets Forecast series that reviews current housing market conditions in the major markets across the state – including Kansas City, Lawrence, Manhattan, Topeka and Wichita – and forecasts housing market activity through the end of 2022. The series also includes Housing Outlooks for 22 smaller markets across the state.

Copies of all the forecast and outlook publications in the series can be found at www.wichita.edu/realestate.

Highlights of the 2022 forecast include the following:

Lawrence forecast

- **Home sales** – Total home sales in the Lawrence area have been dropping this year due to increasingly tight inventories. Sales are predicted to rebound slightly in 2022, rising 1.9 percent to 1,600 units.

- **Construction** – New home construction activity in Lawrence remains stagnant due to a lack of developable land along with labor and material shortages. Permitting activity is expected end the year at 280 units and then fall slightly in 2022 to 275 units.
- **Home prices** – Lawrence home values have been appreciating at an historic pace. Area home values should end the year up 11.1 percent, followed by another 6.7 percent rise in 2022.

Statewide forecast

- **Home sales** – Home sales across Kansas have continued to rise, in spite of historically low inventories across all price segments. Sales are expected to end the year up 3.1 percent and then rise another 6.2 percent in 2022 to 48,430 units.
- **Construction** The lack of supply is spurring a surge in new home construction activity across much of the state. Single-family building permits should end the year at 7,545 units, a robust 26.3 percent gain. Permitting activity will continue to be strong in 2022, rising another 15.9 percent to 8,745 units.
- **Home prices** – In the face of strong demand and incredibly tight inventories, existing home prices are rising at a remarkable pace across most of the state. Prices are forecast to rise 10.5 percent this year followed by another 7.6 percent increase in 2022.
