Find us online at [www.security1st.com](https://www.security1st.com) to contact our local office for more details on how we can assist you.

# OUT OF THIS WORLD

# HOUSING LAWRENCE FORECAST 2022

In the midst of a pandemic and its consequent economic turmoil, it may seem that the Lawrence housing market is defying gravity. The tightest inventories in history have led to bidding wars, rapidly rising home prices, ... and buyer fatigue. Will the market continue a meteoric rise? Or come crashing back to earth?

As we navigate into the uncharted void, the 2022 Lawrence Housing Forecast is here to give you the guidance you need to explore a housing market that is *Out of this World!*

# Economic OVERVIEW

Officially, the recession of 2020 was only two months long, but that doesn't mean its effects were modest. The local unemployment rate rocketed to an all-time high of 13.1 percent in April as the Lawrence metropolitan area lost 17.4 percent of its jobs in just three months. And while the unemployment rate has fallen back to earth in recent months, less than half of the area's lost jobs had been recovered by July of this year.

Mortgage rates rose during the first quarter of the year, only to fall back near historic lows through the summer. When rates will rise again depends largely on when the Federal Reserve pulls back on its holdings of mortgage-backed securities and on whether the recent uptick in inflation proves persistent.

# HOME SALES and CONSTRUCTION

The Lawrence housing market remains white hot, even if it has cooled somewhat in recent months. Tight inventories, however, are holding back sales activity. As a result, we forecast that total home sales in the Lawrence metropolitan area will end the year down slightly at 1,570 units. Supply constraints are likely to continue next year as well, with sales rising only a modest 1.9 percent in 2022 to 1,600 units.

Part of the challenge is that too few new homes have been built in recent years. A lack of developable land along with labor and material shortages make it unlikely this will change any time soon. We forecast that new single-family building permits in the Lawrence metropolitan area will end this year at 280 units, down 2.4 percent from 2020. Permitting activity is projected to fall to 275 units in 2022, a 1.8 percent decline.

• The original name of the Voyager was *Mariner Jupiter-Saturn* but it grew out of it due to progression of technology at the time.

# Home PRICES

Inventories of homes available for sale in the Lawrence metropolitan area remain at historic lows, even among the highest-priced segments. Desirable homes are selling at light speed, and prospective buyers are competing on contract terms as well as price.

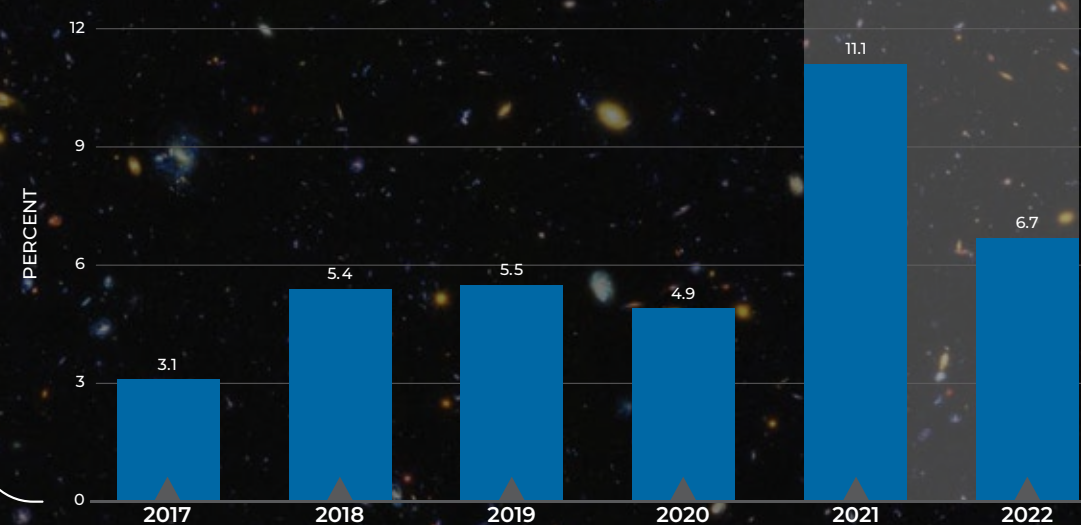

As a result, home prices have been appreciating at an historic pace. We project that Lawrence home values will end the year up 11.1 percent and then rise by another 6.7 percent in 2022.

● Voyager 1 entered interstellar space in August 2012 and is currently 14 billion miles away from the earth.

# Kansas FORECAST

Home sales across Kansas have continued to rise, in spite of historically low inventories across all price segments. We forecast that total home sales in Kansas will end the year up 3.1 percent at 45,610 units, although sales would be stronger if there were simply more homes on the market. Sales will rise again in 2022, increasing 6.2 percent to 48,430 units.

The lack of supply is spurring a surge in new home construction activity across much of the state. Single-family permits are expected to end the year at 7,545 units, an increase of 26.3 percent. Permitting activity should rise again in 2022, ending the year up 15.9 percent at 8,745 units.

In the face of strong demand and incredibly tight inventories, existing home prices are rising at a remarkable pace across most of the state. We project that typical Kansas home values will end the year up 10.5 percent, followed by another 7.6 percent gain in 2022.

● Voyager 1 houses the golden records, photograph records that contain sounds and images from earth intended for any intelligent life who find it.

10 A runaway star, called CW Leo, plowing through the depths of space and piling up interstellar material before it, can be seen in this ultraviolet image from NASA Galaxy Evolution Explorer.
