HOUSING FORECAST

MANHATTAN

2022

In the midst of a pandemic and its consequent economic turmoil, it may seem that the Flint Hills area housing market is defying gravity. The tightest inventories in history have led to bidding wars, rapidly rising home prices, ... and buyer fatigue. Will the market continue a meteoric rise? Or come crashing back to earth?

As we navigate into the uncharted void, the 2022 Manhattan Housing Forecast is here to give you the guidance you need to explore a housing market that is *Out of this World!*

Dr. Stanley D. Longhofer
Director, WSU Center for Real Estate

Economic OVERVIEW

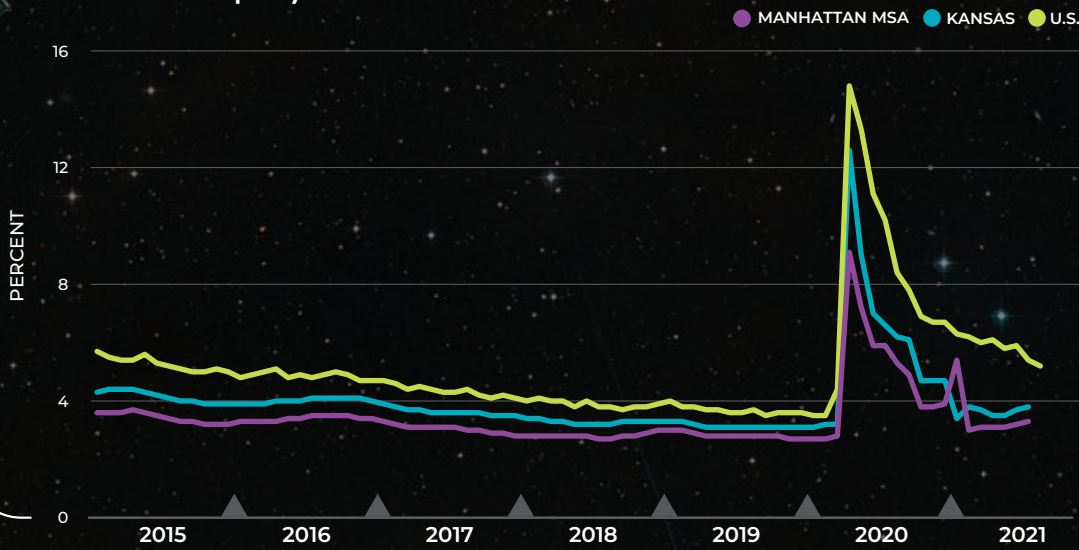

Officially, the recession of 2020 was only two months long, but that doesn't mean its effects were modest. The local unemployment rate rocketed to an all-time high of 9.1 percent in April as the Manhattan-Junction City metropolitan area lost 15.7 percent of its jobs in just three months. And while the unemployment rate has fallen back to earth in recent months, only about a third of the area's lost jobs had been recovered by July of this year.

Mortgage rates rose during the first quarter of the year, only to fall back near historic lows through the summer. When rates will rise again depends largely on when the Federal Reserve pulls back on its holdings of mortgage-backed securities and on whether the recent uptick in inflation proves persistent.

● The Chandra satellite was named after Nobel Prize winner Subrahmanyan Chandrasekhar, known for integrating physics into the study of astronomy and proving the upper limit to the mass of a white dwarf.

HOME SALES and CONSTRUCTION

Home sales activity has exploded in the Manhattan-Junction City metropolitan area over the past year. After rising 22 percent last year, we expect total home sales to end the year at 2,120 units, an increase of 13.1 percent. Next year should see more of the same, with sales rising another 11.8 percent to 2,370 units.

After dropping off in 2020, new home construction activity in the Manhattan-Junction City area has picked up again this year. We expect single-family permitting activity to rise by 18.6 percent this year to 280 units. This should continue in 2022, with permits increasing another 3.6 percent to 290 units.

● Chandra orbits earth at a distance of 65,437 miles.

 - b) U.S. existing home sales as reported by the National Association of REALTORS®; Forecast is the August 2021 Forecast by the National Association of REALTORS®
 - c) Single-Family building permits issued in the Manhattan-Junction City metropolitan area as reported by the U.S. Bureau of the Census
 - d) U.S. single-Family housing starts as reported by the U.S. Bureau of the Census; Forecast is the August 2021 Forecast by the National Association of REALTORS®

Home PRICES

Inventories of homes available for sale in the Manhattan-Junction City metropolitan area remain at historic lows, even among the highest-priced segments. Desirable homes are selling at light speed, and prospective buyers are competing on contract terms as well as price.

Despite the strong sellers' market, however, home price appreciation has remained moderate. We project that home values in the Manhattan-Junction City metropolitan area will rise by 4.6 percent this year, followed by another 4 percent increase in 2022.

● The Chandra satellite is the largest x-ray satellite, having 8 times greater resolution than previous telescopes.

Kansas FORECAST

Home sales across Kansas have continued to rise, in spite of historically low inventories across all price segments. We forecast that total home sales in Kansas will end the year up 3.1 percent at 45,610 units, although sales would be stronger if there were simply more homes on the market. Sales will rise again in 2022, increasing 6.2 percent to 48,430 units.

The lack of supply is spurring a surge in new home construction activity across much of the state. Single-family permits are expected to end the year at 7,545 units, an increase of 26.3 percent. Permitting activity should rise again in 2022, ending the year up 15.9 percent at 8,745 units.

In the face of strong demand and incredibly tight inventories, existing home prices are rising at a remarkable pace across most of the state. We project that typical Kansas home values will end the year up 10.5 percent, followed by another 7.6 percent gain in 2022.

● Chandra is about 45.3 feet wide and 64 feet long, weighing 10,560 pounds.

Notes: Total home sales, average price and sales volume figures include both existing and new home sales. Building permits reflect single-family residential building permits. Home price appreciation figures are the year-over-year percentage change in the Federal Housing Finance Agency all-transactions house price index, as measured using 4th quarter values. Kansas City figures include transactions from both Kansas and Missouri.
