Kansas City Housing Forecast

The Journey Begins

“You’ll never find your way, my lovely.” The witch’s evil laugh sent chills through Ophelia’s bones. “It’s too long a journey and there are more surprises along the path than you can imagine. Once you make it through the woods, you’ll have to find the key home. Good luck!”

The theme of this year’s forecast is “Through the Woods.” And while this might refer to all the obstacles that have beset the housing market in recent years, it also reflects the fact that at long last the worst may be behind us. Like our heroine Ophelia, through pluck and perseverance, we may finally find our way home.

Economic Overview

Kansas City’s employment growth continues to outpace the rest of the state, following more closely with national trends. While the Kansas City unemployment rate has risen somewhat over the past several months, it remains fairly low.

Low mortgage rates continue to support housing markets as well. The Mortgage Bankers Association’s August forecast suggests this will continue for the foreseeable future, with the 30-year mortgage rate remaining below 4.5 percent through the end of 2017.

Mortgage rates
should remain
exceptionally
low in the
coming year.

Home Sales & Construction

Kansas City area home sales continued their upward climb in 2015, rising by 9.7 percent to 35,394 units. Sales continue to grow this year, albeit at a slower pace. We expect sales to rise again in 2017, by 4.5 percent to 38,460 units.

New home construction has continued to accelerate this year as well. After posting a 10.2 percent increase in 2015, permitting activity is on pace to rise by 22.7 percent this year. We expect construction activity to continue to rise in 2017, up 4 percent to 5,810 units.

d) U.S. single-family housing starts as reported by the U.S. Bureau of the Census; forecast is the August 2016 forecast by the National Association of REALTORS®

Home Prices

Even as it seems the market can't get any tighter, the inventory of homes available for sale in the Kansas City area continues to fall. With multiple offer situations becoming increasingly common, it appears that we have transitioned into a sellers' market, at least for homes outside of the highest price ranges.

These tight inventories have caused Kansas City area home prices to climb rapidly, increasing by 6.5 percent on average last year. We forecast that this trend will continue, with average prices rising by 4.9 percent this year and 4.2 percent in 2017.

Kansas Forecast

Home sales activity continues to rise in markets across the state. We forecast that statewide sales will rise by 4.6 percent this year, and increase another 6.2 percent in 2017, to 41,090 units.

Outside of the Kansas City area, new home construction activity has posted only modest gains. We are forecasting that new single family building permits will increase by 6.4 percent in 2017 to 5,745 units, with much of the gain being driven by activity in the Kansas City area.

Markets all across the state are reporting tight inventories of homes available for sale. As a consequence, we are seeing widespread price gains. We forecast that average Kansas home values will rise by 5 percent this year, followed by another 3.8 percent rise in 2017.

A fin glistened and glittered next to her as the mermaid pulled her up towards the opening.

Notes:
Total home sales, average price and sales volume figures include both existing and new home sales. Building permits reflect single-family residential building permits. Home price appreciation figures are the year-over-year percentage change in the Federal Housing Finance Agency all-transactions house price index, as measured using 4th quarter values. Kansas City figures include transactions from both Kansas and Missouri.
