2025 LAWRENCE

KANSAS HOUSING MARKETS FORECAST

2025 LAWRENCE

FULL CIRCLE

This year marks the 25th anniversary of the WSU Center for Real Estate. As we celebrate this milestone, housing markets across the state appear to be returning to the “old normal” not seen since before the Financial Crisis in 2008. After years of turmoil, mortgage rates now seem to be settling into a range we have long thought to be ideal. And while inventories of homes available for sale remain quite tight, market conditions have become more balanced between buyers and sellers.

As the market comes full circle, it’s our pleasure to bring you the 2025 Kansas Housing Markets Forecast Series to help you prepare for all that may lie ahead.

Capitol
Federal®

True Blue® for over 130 years

We are especially grateful to Security 1st Title and Capital Federal Savings for underwriting the cost of preparing this year’s Lawrence Housing Forecast.

We are also grateful to the Lawrence Board of REALTORS®, the Kansas Association of REALTORS® and participating multiple listing services across Kansas for providing much of the data used to prepare this forecast.

Thanks to the many colleagues and friends who have helped make this forecast possible:

Maranda DeSanto | Kansas Association of REALTORS®

Rob Hulse | Lawrence Board of REALTORS®

Participants in the 2024 Lawrence Real Estate Roundtable

ECONOMIC OVERVIEW

The major economic uncertainty of the day is when the Federal Reserve will lower short term interest rates and how far they will drop. Nationally, employment growth has slowed in recent months, giving the Fed more impetus to act. At the same time, while the inflation rate has dropped considerably from the highs seen in 2022, it remains stubbornly above the Fed's two percent target. Housing inflation – the result of nearly 15 years of underbuilding – has moderated recently but continues to help drive up the overall inflation number.

In balance, the Fed appears to be poised to begin lowering rates. At the time of this writing, financial markets expect the Federal Reserve to cut short-term rates by $\frac{3}{4}$ of a percent by the end of 2024. If this happens, however, it does not mean that long-term mortgage rates will fall by the same amount. Indeed, the Mortgage Bankers Association is forecasting that mortgage rates will fall only slightly in the coming year, ending 2025 just below 6 percent. In our view, this is a good thing: Mortgage rates may finally be settling into the range we have always seen as consistent with a healthy market and low inflation.

HOME SALES AND CONSTRUCTION

Home sales activity in the Lawrence metropolitan area has rebounded nicely this year as mortgage rates have dropped nearly 1.5 percentage points from last October's peak. We project that sales across Douglas County will rise 5.2 percent this year to 1,090 units. While demand will remain strong in 2025, the lack of supply will constrain the market. As a result, sales should end the year down slightly, dropping to 1,080 units.

New home construction in the Lawrence area has picked up significantly this year after falling to the lowest levels in a decade in 2022 and 2023. Still, permitting activity remains far below what will be needed to bring housing markets back into balance. We expect that 240 new single-family building permits will be issued across Douglas County in 2024. Construction activity should then level off in 2025, finishing the year down slightly at 235 units.

HOME PRICES

Demand for homes in the Lawrence area continues to outpace supply, with the inventory of homes available for sale still well below the 4 to 6 months' supply typically associated with a balanced market. Nevertheless, buyers remain cautious in the face of higher home prices and financing costs and appear willing to pass on homes they deem overpriced or in less than perfect condition.

As the competitive position of the market has become more balanced, the rapid home price gains seen over the past few years have slowed. We expect that Lawrence area home values will end the year up 2.4 percent in 2024, and then increase by a healthy 3.4 percent in 2025.

KANSAS FORECAST

After falling for the past two years in the face of rising mortgage rates, home sales activity across Kansas has stabilized during the first half of 2024. Inventories remain very tight in most markets, but higher home prices and mortgage rates are holding back buyers, making for a relatively balanced market. We expect that sales across the state will fall slightly this year and then rebound in 2025, rising 3.3 percent to 36,080 units.

The current inventory shortage is ultimately the result of 15 years of too little new home construction, especially at more modest price points. Unfortunately, high construction and financing costs make it difficult for move-up buyers to afford the type of homes we need to build in order to resolve the inventory problem.

The double-digit home price appreciation we experienced in 2021 and 2022 now appears to have slowed. Nevertheless, limited inventories are still putting strong upward pressure on home prices in most markets across the state. We project that Kansas home values will continue to appreciate at an above-normal rate for the foreseeable future, rising 7.9 percent this year, followed by another 6 percent gain in 2025.

NOTES:

Total home sales, average price, and sales volume figures include both existing and new home sales. Building permits reflect single-family residential building permits. Home price appreciation figures are the year-over-year percentage change in the Federal Housing Finance Agency all-transactions house price index, as measured using 4th quarter values. Kansas City home sales, sales volume, and average price figures include all closed transactions reported in the Heartland Multiple Listing Service; Kansas City building permit and home price appreciation figures are for the Kansas City, KS-MO Metropolitan Statistical Area.
